

Document Q&A; – RAG

Question 1: What is Document Q&A;?

Answer: Document Q&A; is a system that allows users to ask questions about the content of a document and receive relevant answers.

Question 2: What does RAG mean?

Answer: RAG means Retrieval-Augmented Generation.

Question 3: Why is RAG used for Document Q&A;?

Answer: RAG retrieves relevant information from the document and provides that information to the language model to generate an answer.

Question 4: What type of file can be used for Document Q&A;?

Answer: A PDF file can be used as the source document for Document Q&A;.

Question 5: What is document retrieval?

Answer: Document retrieval is the process of finding the most relevant parts of a document for a user's question.

Question 6: What is a document chunk?

Answer: A document chunk is a smaller section of a large document used for efficient searching and retrieval.

Question 7: Why are documents divided into chunks?

Answer: Documents are divided into chunks so that relevant information can be retrieved efficiently instead of processing the entire document every time.

Question 8: What happens when a user asks a question?

Answer: The system searches the document for relevant information and uses the retrieved content to generate an answer.

Question 9: What is the role of an LLM?

Answer: The LLM uses the retrieved document context to understand the question and generate a natural-language answer.

Question 10: Can Document Q&A; answer questions outside the document?

Answer: A properly designed system should avoid unsupported answers and indicate when the requested information is not available in the document.

Question 11: What is the main advantage of Document Q&A;?

Answer: It makes it easier to find and understand specific information from large documents.

Question 12: How does RAG improve answers?

Answer: RAG grounds the generated answer in retrieved document content, which can reduce unsupported or irrelevant responses.

Question 13: What is the input to a Document Q&A; system?

Answer: The main inputs are a document and a user's question.

Question 14: What is the output of a Document Q&A; system?

Answer: The output is an answer based on relevant information retrieved from the document.

Question 15: Where can Document Q&A; be useful?

Answer: It can be useful for resumes, reports, manuals, research papers, notes, policies, and other PDF documents.
